# **Arvind Ramaswami**

Johns Creek, GA | 404-458-1072 | saramaswami@gmail.com

LinkedIn: <a href="http://linkedin.com/in/arvind-ramaswami">http://linkedin.com/in/arvind-ramaswami</a> GitHub: <a href="https://github.com/arvindr9">https://github.com/arvindr9</a>

Website: <a href="https://arvindr9.github.io/">https://arvindr9.github.io/</a>
Codeforces: <a href="https://codeforces.com/profile/arvindr9">https://codeforces.com/profile/arvindr9</a>

Interests: Combinatorial optimization, machine learning

\_\_\_\_\_

### **Education**

Georgia Tech (Fall 2017 - Fall 2020): BS Computer Science. (Threads: Intelligence and Theory.

Cumulative GPA: 3.82)

Georgia Tech (Expected Spring 2021 - Fall 2022): MS in Computer Science (Machine Learning,

Cumulative GPA: 3.36)

Relevant Coursework:

**Math Classes**: Advanced Graph Theory, Graduate Probability I, Analysis I, Abstract Algebra I, Algebraic Topology I

**CS Classes**: Machine Learning Theory, High-Performance Computing, Deep Learning, Robot Intelligence: Planning, Applied Cryptography, Intro to Database Systems

Research

Theory CS Research - Advisor: Richard Peng

Jan 2022 - Present

Attempted to make progress on a problem related to the Robust Interior Point method. Currently working on approximation algorithms for the optimal transport problem.

**ML Research -** *Advisor: Jacob Abernethy* 

Sept 2019 — Oct 2021

Evaluated the effectiveness of different optimization algorithms such as Mirror Prox in the adversarial learning problem. Wrote an undergraduate thesis *Minimax Perspective of Adversarial Examples* in Spring 2020.

Worked with a group to develop adversarial robustness algorithms using multiclass boosting.

ML Research - Advisor: Sebastian Pokutta

Jan 2018 - May 2019

Engineered adversarial attacks on random forest classifiers and developed methods to make them more robust.

#### **Publications / Submitted Papers**

Sinkhorn has Exponential Convergence under Regularization (Under review, NeurIPS 2022). With Richard Peng, Yang Liu, Jingbang Chen.

Skills

**Programming languages:** C++, Python, Java, Javascript

**Competitive programming**: Qualified for Round 3 of Google Code Jam (2021), ACM ICPC World Finalist (Rank 6 out of 50 teams in the North America Championship)

Work Experience

**PerfectRec -** *Machine Learning Engineer Intern* 

June 2022 - Aug 2022

Startup for product recommendations. Designing and implementing ML algorithms to recommend and rank products to people by asking them an interactive sequence of questions, under the supervision of Josh Hug.

**Amazon -** *Software Development Engineer (SDE) Intern* 

May 2020 — Aug 2020

Designed a recommender system that matches advertisers to partners for AAPN (Amazon Advertiser Partner Network). Also performed cluster analysis on the advertiser data.

**Lawrence Livermore National Laboratory -** *Software Engineer Intern* 

May 2019 – Aug 2019

Developed a testing framework for the calculations to set up experiments at the National Ignition Facility (NIF), the largest laser facility in the world. Proposed data science techniques to validate the calculations.

#### Leadership

**Georgia Tech Programming Team -** (*President from Spring 2022 to present*)

Aug 2017 - Present

Prepares content for weekly meetings in topics such as dynamic programming, data structures, and combinatorial optimization. Arranges team practices for ICPC.

**Big-O Theory Club - (** *President from Fall 2020 - Spring 2021*)

Aug 2017 - May 2021

Gave talks about theoretical computer science (examples of topics discussed: randomized algorithms, flows) and invited other students to give talks about their research.

**Projects** 

## **ReconBlind Multi-Chess Agent**

Nov 2020

Worked on a team (for the class *Robot Intelligence: Planning*) to create an agent that would play <u>Reconchess</u>. Based our agent on the <u>AlphaGo Zero paper by David Silver</u> and incorporated a policy neural network with Monte-Carlo Tree Search.

DonationTracker Aug 2018 - Dec 2018

Created an Android application in a team of five that allows people in need in Atlanta to locate places to get aid and receive donations. Used SQLite to persist profile information and wrote extensive JUnit tests.

WeLocate Oct 2017

Built a website that uses Yelp's API and AWS Machine Learning to find where to open their business. Received first-place awards at VandyHacks for the Most Disruptive Hack and the Best Financial Hack.

\_\_\_\_\_

#### **Miscellaneous**

Math Contests: Represented Georgia for the American Regions Mathematics League (ARML) in 2015 and 2017, qualifier for American Invitational Mathematics Exam (AIME) in 2017.

**Violin:** Previously a member of the Atlanta Symphony Youth Orchestra, Georgia All-State Orchestra. Currently playing in the Georgia Tech Symphony Orchestra. Also learned conducting under Dr. Chaowen Ting.

**Spoken Languages:** English, Spanish, Tamil, Chinese.
